Blockers

- 1 database_url_configured
- 1 migration_history_query_succeeded
- 1 all_repository_migrations_successfully_applied

Safety

- 1 This gate performs a read-only query of `_prisma_migrations`.
- 1 It does not print or retain the database URL or migration error logs.
- 1 It compares successful history rows with the exact repository migration file checksums.

- 1 A legacy mismatch is accepted only when an approval matches the migration name, exact database checksum, and an exact current repository checksum.
- 1 It does not resolve, apply, roll back, or mutate a migration.
