

Stoquify UI/UX Audit Traceability Register

Audit-to-work traceability, evidence requirements and closure authority

ENTERPRISE REMEDIATION REPORT

Published 2026-08-06

Evidence-led | contract-governed | accessibility-aware | rollout-ready

Truthful workflows. Explicit controls. Verifiable enterprise evidence.

Register ID: STQ-UIUX-REM-2026-08-06 **Status:** execution-ready planning baseline **Finding system of record:** docs/system-audit/STOQUIFY_ENTERPRISE_UI_UX_SYSTEM_AUDIT_2026-08-06.md **Machine-readable mirror:** 01_AUDIT_TRACEABILITY_REGISTER.json

Closure contract

An audit item is not closed because code was merged. Closure requires all of the following:

- 1 the mapped work packages satisfy their Definition of Done;
- 2 automated verification is green on the release candidate;
- 3 the named human/domain reviewer accepts the validation evidence;
- 4 the evidence is reproducible, linked, and within its freshness window;
- 5 the applicable phase/rollout gate is signed;
- 6 rollback has been rehearsed or proven safe; and
- 7 residual risk is accepted by an authority who did not implement the change.

confirmed-open means the current repository still exhibits the weakness. partially-remediated means current source differs materially from the dated audit but the system contract is not closed. design-required means the roadmap establishes a prerequisite contract; it does not claim that contract exists today.

Audit finding coverage

P0-01 — Inventory aggregation truth	Confirmed open	G0-03, A-01, A-02, A-03, C-01, D-02	Pagination-invariant KPI; failure/partial state; currency and tenant isolation	Inventory controller + Accounting Controls Lead	A-P0; C-Inventory
P0-02 — Currency/locale contract	Open with partial foundations	G0-02, A-03, A-04, C-01..C-06, D-01	Money-literal guard; EN/FR × XAF/XOF/EUR/USD; notification/export parity	Internationalization + finance reviewer	A-P0; each C module
P0-03 — Module/package enforcement	Confirmed open; counts refreshed	G0-02, G0-03, A-08, A-09, B-01, B-02, B-06, D-01, D-04	100% protected registry coverage; role/package UI-server parity; observe/enforce telemetry	Security + billing/package owner + support	A-Entitlement; cohort rollout
P0-04 — Dead/simulated actions	Confirmed open	A-05, A-09, C-00, C-01..C-03, D-01	Action inventory; real artifact metadata E2E; simulated-success prohibition	Application platform + audit evidence	A-P0
P0-05 — Public/auth accessibility	Changed since audit, still open	G0-03, A-06, A-07, B-06, D-01, D-02	Zero critical/serious axe; keyboard; field semantics; 320 px/400% zoom	Accessibility Lead; NVDA/VoiceOver and EN/FR review	A-Accessibility
P1-01 — Duplicate/misleading routes	Partially remediated	A-09, B-01, B-02, B-06, C-01, C-02, C-05	Typed registry; locale-preserving redirects; no duplicate implementations	Web platform + support + analytics	B-IA
P1-02 — Theme promise mismatch	Confirmed open	G0-02, B-04, B-05, B-06, C-00..C-06	Theme matrix; contrast; literal-color ratchet	Design Systems + Accessibility	B-Theme; C modules
P1-03 — Static dashboard shortcuts	Confirmed open	A-08, B-01, B-02, B-06	Role/package snapshots; denied destination absence	Product Experience Lead	B-Navigation
P1-04 — Front-loaded registration	Confirmed open	A-06, A-07, B-07, D-02	First-control viewport; resume/idempotency; funnel analytics	Mobile usability + Growth Product	B-Onboarding
P1-05 — Over-composed login	Confirmed open	A-06, A-07, B-06, D-02	Visual/contrast; auth completion; semantic regression	Cognitive, keyboard and screen-reader walkthrough	A-Accessibility
P1-06 — Incomplete route-state contract	Confirmed open; counts refreshed	A-02, B-01, B-03, B-06, C-01..C-06	Registry completeness; state fixtures; correlation IDs	Support + Accessibility	B-State Contract; C modules
P1-07 — Client-component hotspots	Confirmed; graph stale	G0-01, G0-03, C-01..C-07, D-03	Characterization parity; refreshed graph; bundle/render budgets	Domain owners + Principal Frontend Engineer	C modules
P1-08 — Narrow authenticated certification	Confirmed open; counts refreshed	G0-03, B-06, C-01..C-06, D-01, D-02	Manifest coverage; browser matrix; screenshot gate	QE + screen-reader + domain owners	D-Automated

P2-01 — Ungoverned dense tables	Confirmed open	C-00, C-01..C-05	Reflow/keyboard; filter/export parity; measured virtualization	Operational role walkthrough	C modules
P2-02 — Native prompt/confirm	Confirmed open	C-00, C-01, C-03, C-05	Native-dialog scan; focus/escape; audit/idempotency	Accessibility + control owner	C-Shared Primitives
P2-03 — Raw interactive images	Confirmed open	C-00, C-01, C-06, D-03	No-img gate; CLS; offline fallback; alt semantics	POS offline visual review	C modules
P2-04 — Literal copy bypass	Confirmed heuristic; classify at G0	A-03, C-00..C-06, D-02	Literal-copy ratchet; missing keys; pseudo-localization	French linguistic review	C modules
P2-05 — Global CSS/theme islands	Confirmed open	B-04, B-05, C-00..C-06	CSS token ratchet; visual regression; exception inventory	Design-system governance	B-Theme; C modules
P2-06 — Fixed-width legacy forms	Confirmed open	A-06, A-07, B-06	Fixed-width scan; 320 px; 400% zoom	Keyboard + low-vision review	A-Accessibility

Required contract coverage

CT-01 Inventory summary	Scoped, as-of, provenance-bearing inventory KPIs	A-01	C-01, reporting, accounting review	Render unavailable/partial; never substitute zero
CT-02 Read completeness	Complete/partial/stale/unavailable semantics	A-02	B-03, all C modules	Preserve error and correlation metadata
CT-03 DisplayContext	Locale, currency, time zone, format and scope	A-03, A-04	All modules, exports, notifications	Explicit unavailable/configuration state; no silent USD
CT-04 Capability decision	Permission + entitlement + org/location state	A-08	B-02, routes, actions, server policy	Server denial remains authoritative; policy can return to observe
CT-05 Route registry	Canonical route/alias/owner/capability/state metadata	B-01	B-02, B-03, B-06, support, analytics	Time-boxed redirect alias
CT-06 Action/artifact	Real outcome and evidence-bearing exports	A-05, C-00	All action surfaces	Explicit disablement with reason
CT-07 Accessible primitives	Fields, route states, dialogs, focus and announcements	A-06, A-07, B-03, C-00	Public/auth and all modules	Semantic compatibility wrapper
CT-08 Visual token/recipe	Semantic appearance and governed exceptions	B-04, B-05, C-00	All modules	Versioned compatibility alias
CT-09 Resumable onboarding	Persisted, recoverable first-value sequence	B-07	Signup and workspace setup	Preserve progress across version fallback
CT-10 Certification evidence	Risk tiers, fixtures, dimensions, evidence freshness	G0-03, B-06, D-01, D-02, D-05	Release board	Block or reverse release cohort

Revalidated baseline deltas

The dated audit remains authoritative for finding intent. Execution starts from these current-source deltas:

- 1 localized application pages: 139; dashboard pages: 124; all application pages: 140;
- 1 module surface inventory: 19 modules, 387 surfaces, 353 mapped, 257 enforcement candidates, 6 unmapped, 4 missing permissions;
- 1 entitlement default remains `observe`, with explicit `enforce` islands already present;
- 1 current route-state files: 11 loading, 23 error, 14 layouts, 2 not-found; explicit state usage remains incomplete;
- 1 current E2E specs: 10; current axe-integrated files: 6;
- 1 two create-item legacy routes now redirect to the canonical create route and must be verified, not reimplemented;
- 1 earlier landing-page prohibited-ARIA selectors are no longer present; auth field semantics remain deficient and the accessibility suite must be rerun;
- 1 graph evidence (4,121 nodes, 5,321 edges, 135 communities, 755 isolated nodes) is stale/partial and cannot authorize high-risk decomposition until refreshed;
- 1 public EN/FR route smoke passed on 2026-08-06, but dev-server timings are not production performance evidence.

Machine-readable field contract

Every entry in the JSON mirror carries: stable ID, category, priority, evidence/revalidation state, impacted roles/domains, control boundary, target outcome, producing work packages, contract dependencies, automated verification, human validation, accountable reviewer, rollout gate, rollback action, residual risk, and disposition. The roadmap validator rejects missing mappings, unknown work-package IDs, unknown contract dependencies, and dependency cycles.
