

Stoquify Enterprise UI/UX Remediation — Final Readiness Report

Template for evidence-backed independent release assurance

ENTERPRISE REMEDIATION REPORT

Published 2026-08-06

Evidence-led | contract-governed | accessibility-aware | rollout-ready

Truthful workflows. Explicit controls. Verifiable enterprise evidence.

Template status: unexecuted. Replace every < . . . > field and attach evidence; do not delete failed, waived, or not-applicable rows. “Not applicable” requires rationale and reviewer approval.

Document control

Program / release ID	<STQ-UIUX-REM- . . . >
Candidate commit SHA	<sha>
Build / artifact ID	<id>
Environment	<environment>
Report version	<semver>
Prepared by	<name/role>
Independent reviewer	<name/role>
Evidence cutoff	<timestamp>
Proposed cohort/date	<scope/date>
Decision	<GO / CONDITIONAL GO / NO-GO>

1. Executive decision

Recommendation: <GO / CONDITIONAL GO / NO-GO>

Certified claim: <state exact routes, roles, packages, states, locales, currencies, themes, browsers, viewports, country/organization scope and exclusions>

Decision rationale: <concise evidence-based rationale>

Conditions, if any: <owner, action, due date, expiry, compensating control, rollback trigger>

Explicitly not certified: <scope exclusions and reason>

2. Release scope and lineage

Authoritative audit	docs/system-audit/STOQUIFY_ENTERPRISE_UI_UX_SYSTEM_AUDIT_2026-08-06.md
Roadmap version	<link/hash>
Traceability register version	<link/hash>
Certification manifest version	<link/hash>
ADR set	<links>
Included work packages	<IDs and versions>
Included modules/routes	<registry query/export>
Included migrations/config/flags	<IDs>
Prior certified baseline	<release/evidence ID>
Diff from prior baseline	<summary/link>

3. Audit closure

P0-01	<closed/open>	<...>	<IDs>	<signoff>	<ID>	<...>
P0-02	<closed/open>	<...>	<IDs>	<signoff>	<ID>	<...>
P0-03	<closed/open>	<...>	<IDs>	<signoff>	<ID>	<...>
P0-04	<closed/open>	<...>	<IDs>	<signoff>	<ID>	<...>
P0-05	<closed/open>	<...>	<IDs>	<signoff>	<ID>	<...>
P1-01	<...>	<...>	<...>	<...>	<...>	<...>
P1-02	<...>	<...>	<...>	<...>	<...>	<...>
P1-03	<...>	<...>	<...>	<...>	<...>	<...>
P1-04	<...>	<...>	<...>	<...>	<...>	<...>
P1-05	<...>	<...>	<...>	<...>	<...>	<...>
P1-06	<...>	<...>	<...>	<...>	<...>	<...>
P1-07	<...>	<...>	<...>	<...>	<...>	<...>
P1-08	<...>	<...>	<...>	<...>	<...>	<...>
P2-01..P2-06	<individual rows required in final>	<...>	<...>	<...>	<...>	<...>

Closure invariant: an open P0 yields N0 - G0. P1/P2 exceptions require the waiver table below and cannot contradict a phase-gate non-waivable condition.

4. Contract readiness

CT-01 Inventory summary	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-02 Read completeness	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-03 DisplayContext	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-04 Capability decision	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-05 Route registry	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-06 Action/artifact	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-07 Accessible primitives	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-08 Visual tokens/recipes	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-09 Resumable onboarding	<...>	<...>	<...>	<...>	<...>	<...>	<...>
CT-10 Certification evidence	<...>	<...>	<...>	<...>	<...>	<...>	<...>

5. Phase and work-package status

Gate 0	<...>	<...>	<...>	<...>	<...>
Phase A	<...>	<...>	<...>	<...>	<...>
Phase B	<...>	<...>	<...>	<...>	<...>
C-Shared	<...>	<...>	<...>	<...>	<...>
C-Inventory	<...>	<...>	<...>	<...>	<...>
C-Purchasing/AP	<...>	<...>	<...>	<...>	<...>
C-Finance/Accounting	<...>	<...>	<...>	<...>	<...>
C-HRIS/Payroll	<...>	<...>	<...>	<...>	<...>
C-Settings	<...>	<...>	<...>	<...>	<...>
C-POS	<...>	<...>	<...>	<...>	<...>
C-07 decomposition	<...>	<...>	<...>	<...>	<...>
Phase D	<...>	<...>	<...>	<...>	<...>

Attach a machine-readable export for every work package; summary rows do not replace individual DoD evidence.

6. Automated verification results

npm run typecheck	<...>	<...>	<...>	<...>	<...>	<...>
npm run lint	<...>	<...>	<...>	<...>	<...>	<...>
npm test -- --runInBand	<...>	<...>	<...>	<...>	<...>	<...>
npm run build:app	<...>	<...>	<...>	<...>	<...>	<...>
npm run policy:gates	<...>	<...>	<...>	<...>	<...>	<...>
npm run verify:repo	<...>	<...>	<...>	<...>	<...>	<...>
npm run test:e2e	<...>	<...>	<...>	<...>	<...>	<...>
npm run uiux:release:gate	<...>	<...>	<...>	<...>	<...>	<...>
<all remaining commands from 04 matrix>	<...>	<...>	<...>	<...>	<...>	<...>

Failed and retried runs

<...>	<...>	<...>	<...>	<...>	<...>	<...>

7. Certification-manifest coverage

Tier 0	<...>	<...>	<...>	<...>	<...>	<...>
Tier 1	<...>	<...>	<...>	<...>	<...>	<...>
Tier 2	<...>	<...>	<...>	<...>	<...>	<...>
Aliases	<...>	<...>	<...>	<...>	<...>	<...>

Provide drill-down by route/action, role, package, capability decision, organization/location, state, locale, currency, time zone, theme, browser, viewport, connection state, fixture hash, and commit. Tier-0/Tier-1 missing coverage is a no-go.

8. Human validation

V-01 Accessibility	<...>	<...>	<...>	<...>	<...>	<...>
V-02 Localization	<...>	<...>	<...>	<...>	<...>	<...>
V-03 Inventory controls	<...>	<...>	<...>	<...>	<...>	<...>
V-04 Purchasing/AP	<...>	<...>	<...>	<...>	<...>	<...>
V-05 Finance/close	<...>	<...>	<...>	<...>	<...>	<...>
V-06 Payroll/privacy	<...>	<...>	<...>	<...>	<...>	<...>
V-07 POS	<...>	<...>	<...>	<...>	<...>	<...>
V-08 Administration	<...>	<...>	<...>	<...>	<...>	<...>
V-09 Onboarding	<...>	<...>	<...>	<...>	<...>	<...>
V-10 Release operations	<...>	<...>	<...>	<...>	<...>	<...>

9. Security, privacy, controls, and accessibility attestations

Tenant isolation	Did every changed read/action prove organization and location isolation?	<...>	Security
Authorization	Do UI visibility, deep links, actions and server policy agree?	<...>	Security/Entitlements
Financial truth	Are scope, currency, as-of, provenance and completeness correct?	<...>	Accounting Controls
Audit evidence	Are actions, reasons, exports and outcomes durable and correlated?	<...>	Controls
Privacy	Is personal data minimized, scoped, redacted and retained correctly?	<...>	Privacy
Accessibility	Is the exact certified scope WCAG 2.2 AA validated, including manual AT?	<...>	Accessibility
Localization	Are EN/FR semantics, OHADA terms and money/date/number formats approved?	<...>	Localization

10. Performance, reliability, and observability

Tier-0 route availability/error	<...>	<...>	<...>	<...>	<...>	<...>
Tier-1 task completion/error	<...>	<...>	<...>	<...>	<...>	<...>
Inventory summary P95/completeness	<...>	<...>	<...>	<...>	<...>	<...>
Capability decision P95/mismatch	<...>	<...>	<...>	<...>	<...>	<...>
Export success/artifact availability	<...>	<...>	<...>	<...>	<...>	<...>
POS online/offline/replay	<...>	<...>	<...>	<...>	<...>	<...>
Client bundle/rend er/interaction	<...>	<...>	<...>	<...>	<...>	<...>

11. Rollout and rollback readiness

Eligible cohort and exclusions defined	<...>	<...>
Flags/config versioned, audited and expiring	<...>	<...>
Old/new telemetry distinguishable	<...>	<...>
Support/on-call/change communications ready	<...>	<...>
Backward data/contract compatibility proven	<...>	<...>
Rollback drill completed within target RTO	<...>	<...>
Queued jobs/offline replay/artifacts safe under rollback	<...>	<...>
Pause/rollback triggers installed and tested	<...>	<...>

Cohort history

R0	<...>	<...>	<...>	<...>	<...>	<...>
R1	<...>	<...>	<...>	<...>	<...>	<...>
R2	<...>	<...>	<...>	<...>	<...>	<...>
R3+	<...>	<...>	<...>	<...>	<...>	<...>

12. Change, training, support, and adoption

Required role training complete and assessed	<...>	<...>	Change Lead
Support readiness review passed	<...>	<...>	Support Lead
EN/FR KB and controlled glossary current	<...>	<...>	Localization/Support
Canonical route and deprecation communications issued	<...>	<...>	Web Platform/CSM
Adoption/task-success guardrails met	<...>	<...>	Product Analytics
Known limitations communicated without overclaim	<...>	<...>	Product/Legal/Assurance

13. Open risks, assumptions, decisions, and waivers

Residual risks

<...>	<...>	<...>	<...>	<...>	<...>	<...>

Assumption validation

<...>	<validated/false/open>	<...>	<...>	<...>

Waivers

<...>	<...>	<...>	<...>	<...>	<...>	<...>	<...>	<...>

No waiver is permitted for a known cross-tenant exposure, incorrect material financial truth, false business completion, missing server authorization, open critical accessibility barrier on Tier-0/Tier-1 scope, or unavailable rollback for a destructive/irreversible change.

14. Final approvals

Program Director	<...>	<...>	<...>	<...>
Product Executive	<...>	<...>	<...>	<...>
Principal Architect	<...>	<...>	<...>	<...>
Security Architecture Lead	<...>	<...>	<...>	<...>
Accounting Controls Lead	<...>	<...>	<...>	<...>
Accessibility Lead	<...>	<...>	<...>	<...>
Quality Engineering Lead	<...>	<...>	<...>	<...>
SRE Lead	<...>	<...>	<...>	<...>
Support Readiness Lead	<...>	<...>	<...>	<...>
Release Director	<...>	<...>	<...>	<...>
Independent Assurance Lead	<...>	<G0/N0-G0>	<...>	<...>

15. Evidence index

<...>	<test/scan/sc reenshot/AT/v alidation/rol lout/drill>	<...>	<...>	<...>	<...>	<...>

Independent assurance statement: <state whether the evidence supports the exact certified claim, identify exclusions, and confirm that no implementation owner self-certified their own material control>.
