

Stoquify Enterprise UI/UX Remediation Report Package

Navigation and publication boundary for the complete remediation package

ENTERPRISE REMEDIATION REPORT

Published 2026-08-06

Evidence-led | contract-governed | accessibility-aware | rollout-ready

Truthful workflows. Explicit controls. Verifiable enterprise evidence.

Published: 2026-08-06 **Package status:** executable roadmap; application implementation and product certification remain pending **Formats:** every report listed below is supplied as both Markdown (.md) and PDF (.pdf).

Start here

- 1 [STOQUIFY_ENTERPRISE_UI_UX_REMEDIATION_ROADMAP_2026-08-06.md / .pdf](#) — authoritative program roadmap.
- 2 [00_EXECUTIVE_ROADMAP.md / .pdf](#) — executive scope, baseline, critical path, estimates, governance and RACI.
- 3 [01_AUDIT_TRACEABILITY_REGISTER.md / .pdf](#) — human-readable mapping from every audit finding to work, proof, validation, gates and rollback.
- 4 [02_DEPENDENCY_AND_CRITICAL_PATH.md / .pdf](#) — system contracts, dependencies, safe parallelization and architecture decisions.
- 5 [03_WORK_BREAKDOWN_STRUCTURE.md / .pdf](#) — detailed Gate 0, Phase A and Phase B packages.
- 6 [03_WORK_BREAKDOWN_STRUCTURE_PHASE_C_D.md / .pdf](#) — detailed module-normalization and final-certification packages.
- 7 [04_VERIFICATION_VALIDATION_MATRIX.md / .pdf](#) — automated commands, evidence rules and human validation protocols.
- 8 [06_PHASE_GATES_AND_RELEASE_CRITERIA.md / .pdf](#) — entry/exit criteria, decision authorities, freshness and waiver policy.
- 9 [07_ROLLOUT_AND_ROLLBACK_RUNBOOK.md / .pdf](#) — cohorts, guardrails, incident triggers and rollback procedures.
- 10 [08_RISK_ASSUMPTION_DECISION_LOG.md / .pdf](#) — risks, assumptions, ADRs and multidisciplinary review.
- 11 [09_CHANGE_MANAGEMENT_SUPPORT_AND_TRAINING.md / .pdf](#) — communications, training, support and adoption.
- 12 [10_FINAL_READINESS_REPORT_TEMPLATE.md / .pdf](#) — final evidence pack and independent go/no-go template.

Machine-readable execution artifacts

- 1 [01_AUDIT_TRACEABILITY_REGISTER.json](#) — 32 work packages, all 19 audit findings, 10 system contracts and dependencies.
- 1 [05_ROUTE_ROLE_CAPABILITY_CERTIFICATION_MANIFEST.json](#) — planned route × role × package × capability × state certification matrix.
- 1 [uiux-certification-manifest.schema.json](#) — JSON schema for the certification manifest.
- 1 [validate_roadmap.py](#) — structural validator for the original roadmap source package.
- 1 [generate_reports.py](#) — reproducible Markdown-to-PDF generator for this publication folder.

Certification boundary

The PDFs are publication copies of the Markdown sources. They do not certify the Stoquify application. Certification requires implementation of the work packages, current automated evidence, named human validation, progressive rollout, rollback rehearsal and independent assurance as defined by the roadmap.
