

Stoquify Agent Runtime Phase 2A Freeze Commit Attestation

Evaluated: 2026-07-27T07:10:52.411Z
Status: BLOCKED
Freeze verified: No
Clean release ready: No
Activation authorized: No
Phase 3 authorized: No

Frozen Source

Field	Value
Branch	codex/service-boundary-burndown
Frozen commit	85eb50ef792908ae1e3ecbe7bd34b6054c79cf52
Current HEAD	5dc78f2c007c51e151342de08be34b72994839bb
Frozen commit is current HEAD	No
Frozen commit is current HEAD ancestor	Yes
Parent	ac30ee75314a0a2a2fcd6bd2ed65afb280aa0d5e
Manifest base	ac30ee75314a0a2a2fcd6bd2ed65afb280aa0d5e
Manifest	docs/agents-runtime/STOQUIFY_AGENT_RUNTIME_PHASE_2A_FREEZE_CANDIDATE_FILE_MANIFEST_2026-07-25.json

Commit Verification

Check	Result
Manifest files	207
Commit candidate files	207
Verified files	206
Missing paths	0
Unexpected paths	0
Content mismatches	1
Exact committed blobs	175
Line-ending equivalents	5
Git filtered-commit equivalents	0
Git clean-filter equivalents	26

Post-Freeze Worktree

Classification	Count
Working-tree changes	381
Working-tree evidence/control remediation	148
Commits since freeze: changed paths	52
Commits since freeze: evidence/control paths	51
Working-tree Phase 2A runtime drift	8
Committed Phase 2A runtime drift	0
Total Phase 2A runtime drift	8
Working-tree outside candidate scope	225
Commits since freeze: outside candidate scope	1

The historical frozen commit can be verified after HEAD advances. A different current HEAD or a dirty worktree still blocks clean release and CI evidence.

Blockers

- `FREEZE_COMMIT_CONTENT_MISMATCH:components/agents/__tests__/AgentCommandPanel.test.tsx`
- `POST_FREEZE_RUNTIME_DRIFT:actions/agents/__tests__/command-agent.actions.test.ts`
- `POST_FREEZE_RUNTIME_DRIFT:actions/agents/command-agent.actions.ts`
- `POST_FREEZE_RUNTIME_DRIFT:components/agents/AgentCommandPanel.tsx`
- `POST_FREEZE_RUNTIME_DRIFT:components/agents/__tests__/AgentCommandPanel.test.tsx`
- `POST_FREEZE_RUNTIME_DRIFT:prisma/schema.prisma`
- `POST_FREEZE_RUNTIME_DRIFT:services/agents/__tests__/agent-output-validator.service.test.ts`
- `POST_FREEZE_RUNTIME_DRIFT:services/agents/command-agent-contracts.ts`
- `POST_FREEZE_RUNTIME_DRIFT:services/agents/skills/role-daily-brief.skill.ts`

Safety

- The historical candidate manifest is not rewritten.
- Working-tree byte hashes are accepted only through an exact committed blob, a deterministic line-ending equivalent, or an unchanged checkout whose Git clean filter maps to the committed blob.
- Post-freeze Phase 2A runtime drift blocks this attestation whether committed or still in the worktree; evidence-only and unrelated changes remain visible.
- This attestation does not prove protected CI, deploy an artifact, activate an agent, or authorize Phase 3.
