

Stoquify Agent Runtime Release Evidence Classification Hardening Execution Report

The durable report is:

`docs/agents-`

`runtime/STOQUIFY_AGENT_RUNTIME_RELEASE_EVIDENCE_CLASSIFICATION_HARDENING_EXECUTION_REPORT_2026-07-25.md`

Result

- Structural release-index checks: 11/11 passed.
- Structural blockers: 0.
- Release blockers: 6.
- Status: **blocked**.
- Activation authorized: No.

Valid blocked readiness artifacts are now reported as release blockers rather than malformed evidence. The history cursor signing secret is also represented in the global release conditions.

Next

Remain on `017-aqstoqflow-enterprise-release-gate`. Resolve the statutory, production database, production secret, scheduler, approval, ownership, alert, credential, and immutable release-identity evidence before promotion.
