Public Receipt Token Config Gate

Generated: 2026-09-23T20:21:43.971Z Mode: `fail` Root: `E:\ohada saas\Focused projects\stoquify`

Summary

- Status: `ready`
- Release secret enforcement: `off`
- Checks ready: 4/4
- Blockers: 0
- Warnings: 1
- Secret configured: no
- Secret value printed: no

Checks

Status	Check
ready	Public receipt token helper exists
ready	Token helper signs, expires, and compares safely
ready	Public receipt route requires a token before service access
ready	Public receipt service verifies token and registry before lookup

Blockers

No public receipt token configuration blockers detected.

Warnings

- receipt_token_secret: Production public receipt token secret is not configured.

Safety Notes

- This gate never prints secret values.
- Local development can run without a receipt token secret; production/release mode cannot.
- Public receipt URLs remain unsafe for launch unless token signing is configured in the release environment.
