Source provenance

See `source-final.json` for current SHA-256s. Compare initial-manifest changes against `baseline/`, and consult the domain review for files outside that initial manifest. Do not treat the entire dirty Git diff as this run.

Path	Baseline comparison
`actions/pos/__tests__/cart-write-access.actions.test.ts`	changed
`actions/pos/__tests__/drawer-dashboard.actions.test.ts`	changed
`actions/pos/__tests__/offline-review.actions.test.ts`	changed
