G1 AUTHORIZATION PREFILL AND SOD REPORT

Prepared 2026-08-19

Evidence-bound | approval-gated | fail-closed

No production claim without authentic evidence.

Date: 2026-08-19 **Classification:** Candidate working copy — not approval evidence **Page-6 source SHA-256:** 34356ac2c77db34300f13b60d6538dad25bec0439641bbcd693c97e799b2981f **Frozen contract SHA-256:** 11434eb3e1af1826516426e90d2d53a2faa47ade361d91191b5f3e0c950a36db

Outcome

The 17 page-6 names were mapped by exact canonical role across all 33 G1 obligations. The existing page-7 matrix contained only 6 correct name/role repetitions; **27 of 33 rows were corrected** in the separate working copy.

No page-6 person could be independently matched to an authoritative identity or HR employee record in the configured database. The asserted tenant was not found. The HRIS contains zero employment assignments and zero manager delegations. Therefore:

- 1 verified stable subject IDs: **0/17**;
- 1 verified role appointments: **0/17**;
- 1 formal SoD/COI results: **0/17**;
- 1 verified obligations: **0/33**;
- 1 complete decisions: **0/11**.

Every unsupported field is marked UNRESOLVED — GOVERNANCE EVIDENCE REQUIRED. The live approval register was not modified.

Exact matches for page-6 names	0 users; 0 employees
Page-6 tenant matches	0
HR employment assignments	0
HR manager delegations	0

Ordinary application RBAC was not accepted as governance authority. Repository reports identify separate unresolved migration identity-role conflicts for Tamen Marceline and Yonga Springfield; those reports do not validate either person for a G1 role.

The absence of duplicate display names is not a formal SoD PASS. Stable identities, exact appointments and independent checkers remain unavailable.

What governance must provide next

- 1 A controlled identity record for each candidate, including a stable immutable subject ID and the authoritative tenant.
- 2 A dated appointment or delegation for each exact canonical role, including scope, effective dates and appointing authority.
- 3 A formal SoD/COI assessment based on stable subject IDs, with any exception approved by an independent authority.
- 4 Independent checkers/verifiers who are different from the signer, evidence producer and authority verifier for the same obligation.
- 5 Controlled signing envelopes, fresh authentication, trusted timestamps, resolvable signature references and immutable evidence hashes.

Only after those records exist may the live approval register be populated and the two narrow G1 gates be run.
