C. D-01 approval and evidence sheet

Decision title	Store-credit tender disposition
Exact selected option	DISABLE_HIDE_AND_REJECT_STORE_CREDIT
Complete contract SHA-256	11434eb3e1af1826516426e90d2d53a2faa47ade361d91191b5f3e0c950a36db
Evidence to review	services/pos/pos.service.ts components/pos/ProfessionalPOSSystem.tsx
Affected capabilities	pos.store-credit
Fail-closed policy	Fail closed by hiding and rejecting store credit if the control, ledger or approval evidence is missing or invalid.

Decision record - accountable owners complete together

Decision intent	APPROVE / REJECT	Effective version	0.2.0
Accountable rationale	TO BE FILLED	Review / expiry at	TO BE FILLED (ISO-8601)
Evidence exceptions	TO BE FILLED or NONE	Rollback accepted	YES / NO
Decision status	PENDING until all 3 pass	Imported to live register	NO - verifier completes later

Authority assignment

Exact role	Name	Stable subject ID	Authority reference	Scope / effective dates	SoD / COI	Governance verifier
Product owner	TO BE FILLED	TO BE FILLED	TO BE FILLED	TO BE FILLED	PASS / FAIL	Name/ID/date
Financial controller	TO BE FILLED	TO BE FILLED	TO BE FILLED	TO BE FILLED	PASS / FAIL	Name/ID/date
Payments owner	TO BE FILLED	TO BE FILLED	TO BE FILLED	TO BE FILLED	PASS / FAIL	Name/ID/date

Controlled approval and independent verification

Exact role	Auth method / MFA	Fresh auth at	Approved at	Envelope / signature ref	Evidence SHA-256	Independent verifier	Result
Product owner	SYSTEM	SYSTEM	SYSTEM	SYSTEM	VERIFIER RECOMPUTES	Name/ID/date	PASS / FAIL
Financial controller	SYSTEM	SYSTEM	SYSTEM	SYSTEM	VERIFIER RECOMPUTES	Name/ID/date	PASS / FAIL
Payments owner	SYSTEM	SYSTEM	SYSTEM	SYSTEM	VERIFIER RECOMPUTES	Name/ID/date	PASS / FAIL

1. Governance verifies the real signer, exact role, tenant, active authority, qualification where applicable, and SoD before the envelope is issued.
2. The signer reviews every source above, sees the complete contract hash, freshly authenticates and deliberately selects approve or reject.
3. The trusted workflow records freshAuthenticatedAt and approvedAt; approval must occur at or after authentication and within ten minutes.
4. Export the final immutable approval and audit trail. Do not paste or reuse a signature image.
5. A separate verifier resolves the authority/signature references and independently recomputes the contract and evidence SHA-256 values.
6. Only after all three rows pass may this decision be entered as APPROVED in the live register.

C. D-02 approval and evidence sheet

Decision title	Physical terminal/register and drawer session boundary
Exact selected option	TERMINAL_CURRENT_SESSION_CAS_PLUS_ONE_SESSION_DRAWER_OPENING_CLAIM
Complete contract SHA-256	11434eb3e1af1826516426e90d2d53a2faa47ade361d91191b5f3e0c950a36db
Evidence to review	prisma/schema.prisma:POSStation.currentSessionId services/pos/pos.service.ts:openPOSShift services/pos/pos.service.ts:commitPOSSale
Affected capabilities	pos.terminal-session, pos.drawer-opening-claim
Fail-closed policy	Disable sale finalization on terminal/session ownership conflict and require accountable recovery review.

Decision record - accountable owners complete together

Decision intent	APPROVE / REJECT	Effective version	0.2.0
Accountable rationale	TO BE FILLED	Review / expiry at	TO BE FILLED (ISO-8601)
Evidence exceptions	TO BE FILLED or NONE	Rollback accepted	YES / NO
Decision status	PENDING until all 3 pass	Imported to live register	NO - verifier completes later

Authority assignment

Exact role	Name	Stable subject ID	Authority reference	Scope / effective dates	SoD / COI	Governance verifier
Retail operations owner	TO BE FILLED	TO BE FILLED	TO BE FILLED	TO BE FILLED	PASS / FAIL	Name/ID/date
POS architect	TO BE FILLED	TO BE FILLED	TO BE FILLED	TO BE FILLED	PASS / FAIL	Name/ID/date

Exact role	Auth method / MFA	Fresh auth at	Approved at	Envelope / signature ref	Evidence SHA-256	Independent verifier	Result
Financial controller	SYSTEM	SYSTEM	SYSTEM	SYSTEM	VERIFIER RECOMPUTES	Name/ID/date	PASS / FAIL
Retail operations owner	SYSTEM	SYSTEM	SYSTEM	SYSTEM	VERIFIER RECOMPUTES	Name/ID/date	PASS / FAIL
Risk owner	SYSTEM	SYSTEM	SYSTEM	SYSTEM	VERIFIER RECOMPUTES	Name/ID/date	PASS / FAIL

1. Governance verifies the real signer, exact role, tenant, active authority, qualification where applicable, and SoD before the envelope is issued.

2. The signer reviews every source above, sees the complete contract hash, freshly authenticates and deliberately selects approve or reject.

3. The trusted workflow records freshAuthenticatedAt and approvedAt; approval must occur at or after authentication and within ten minutes.

4. Export the final immutable approval and audit trail. Do not paste or reuse a signature image.

5. A separate verifier resolves the authority/signature references and independently recomputes the contract and evidence SHA-256 values.

6. Only after all three rows pass may this decision be entered as APPROVED in the live register.

C. D-07 approval and evidence sheet

Decision title	Pilot country, currency, language and fiscal profile
Exact selected option	CAMEROON_XAF_EN_FR_DEVELOPMENT_ONLY
Complete contract SHA-256	11434eb3e1af1826516426e90d2d53a2faa47ade361d91191b5f3e0c950a36db
Evidence to review	what-next/statutory-country-pack-production-readiness.json docs/HR-Payroll/evidence/country-packs/CM/2026-07-19/manifest.json
Affected capabilities	country-pack.cm, currency.xaf, locale.en, locale.fr, pos.development-pilot
Fail-closed policy	Keep production fiscalization and statutory claims disabled while qualified review, provenance or independent checking is incomplete.

Retail operations owner	SYSTEM	SYSTEM	SYSTEM	SYSTEM	VERIFIER RECOMPUTES	Name/ID/date	PASS / FAIL

1. Governance verifies the real signer, exact role, tenant, active authority, qualification where applicable, and SoD before the envelope is issued.
2. The signer reviews every source above, sees the complete contract hash, freshly authenticates and deliberately selects approve or reject.
3. The trusted workflow records freshAuthenticatedAt and approvedAt; approval must occur at or after authentication and within ten minutes.
4. Export the final immutable approval and audit trail. Do not paste or reuse a signature image.
5. A separate verifier resolves the authority/signature references and independently recomputes the contract and evidence SHA-256 values.
6. Only after all three rows pass may this decision be entered as APPROVED in the live register.

D. Final instructions for filling and signing

A handwritten picture, typed name or ordinary application role does not validate G1. The authenticated audit trail and exact artifact binding make the approval acceptable.

1. Fill the authority roster first

An authorized HR, security, governance or corporate-secretary owner completes Part A using stable subject IDs and controlled appointment references. Resolve the six documentary names separately; do not assume any is a G1 approver.

2. Map people to all 33 obligations

Complete Part B only after the exact role appointment is proven. A person may cover multiple rows only when every role is explicitly appointed and the approved SoD policy allows it.

3. Prepare one controlled envelope per decision or signer

Every envelope must state the decision ID, selected option, artifact ID, version, path, complete SHA-256, exact role, rationale, evidence, affected capabilities and rollback policy.

4. Require fresh authentication

The signer reauthenticates through the approved organization-controlled workflow, preferably with MFA. Do not type timestamps manually. The trusted workflow clock records them.

5. Obtain deliberate intent within ten minutes

The signer selects APPROVE or REJECT. If more than ten minutes passes after fresh authentication, stop and require a new authentication event.

6. Export immutable evidence

Export the final approval artifact and audit certificate without editing them. Record the envelope/signature reference and final evidence path or URI.

7. Hash the exact final bytes

Compute lowercase SHA-256 over the exported approval evidence. A path without a content hash is not sufficient.

8. Independently verify

A different authorized verifier confirms stable identity, exact authority, tenant, dates, qualification, SoD, decision/hash binding, authentication window, signature-reference resolution and the recomputed evidence hash.

9. Populate the live register last

Only verified records go to `docs/pos-enterprise-grade-audit/EXECUTION\_06\_G1\_CONTRACT\_APPROVAL\_REGISTER.json`. A decision receives credit only when all three exact roles pass.

10. Rerun the narrow gates

Run `npm run pos:g1:contract:gate` and `npm run pos:enterprise:program:gate`. G1 must report 11/11. G2 becomes eligible but does not pass automatically.

Packet-level governance attestation - complete only after all decision sheets

Authority roster owner	TO BE FILLED	Stable subject ID	TO BE FILLED
Authority reference	TO BE FILLED	Organization / tenant	TO BE FILLED
Fresh authenticated at	SYSTEM	Approved at	SYSTEM - within 10 minutes
Envelope / signature ref	SYSTEM	Evidence SHA-256	VERIFIER RECOMPUTES
Independent packet verifier	TO BE FILLED	Verifier authority ref	TO BE FILLED
Verified at	SYSTEM	Verification result	PASS / FAIL
33 obligations verified	YES / NO	11 decisions complete	YES / NO
Live register import authorized	YES / NO	G1 gate result	PENDING / PASSED

Final warning: this completion form does not itself prove legal enforceability or production authorization. G1 credit comes only from authentic, independently verified records accepted by the live gate against the unchanged contract hash.
