

Stoquify enterprise POS gate status — post-fix 2026-08-18

G1 technical remediation, authentic approval requirements, and controlled next steps

BLOCKER AND GATE CONTROL REPORT

Prepared 2026-08-18

Evidence-bound | approval-gated | fail-closed

No production claim without authentic evidence.

Status: **BLOCKED** Program controller: **PROGRAM_CONTROL_PLANE_READY** First blocking gate: **G1** Passed gates: **0/10** Verified external evidence: **0/9**

The G1 technical defect is resolved. G1 is now blocked only by authentic approvals for D-01 through D-11. Later gates remain dependency-blocked and are not automatically validated by fixing G1.

G1	BLOCKED_AUTHENTIC_APPROVALS	None
G2	BLOCKED_DEPENDENCY	G1
G3A	BLOCKED_DEPENDENCY	G2
G3B	BLOCKED_DEPENDENCY	G2
G4	BLOCKED_DEPENDENCY	G2, G3B
G5	BLOCKED_DEPENDENCY	G3A, G3B, G4
G6	BLOCKED_DEPENDENCY	G2
G7	BLOCKED_DEPENDENCY	G3A, G3B, G6
G8	BLOCKED_DEPENDENCY	G3A, G3B, G4, G5, G6, G7
G9	BLOCKED_DEPENDENCY	G8

When all 11 G1 decisions receive valid approval evidence, rerun the G1 gate. A passed G1 will remove the dependency block from G2, but G2 must still satisfy its own transaction, access, concurrency, migration, and evidence requirements.
