

Stoquify blocker, gate, and template evidence reconciliation — 2026-08-18

Blocker and gate readiness evidence

BLOCKER AND GATE ASSESSMENT REPORT

Prepared 2026-08-18

Evidence-led · bilingual-ready · accessibility-aware · implementation-bounded

Connected operations. Explicit controls. Inspectable evidence.

Overall posture: **development may continue; production, statutory, provider, hardware, migration, pilot, and release authorization remain fail-closed.**

This assessment reconciles B01–B12, G1–G9, D-01–D-11, the destructive-migration bundle, authentication attestation, Cameroon review, and hardware matrix against current source bytes and current validators. Historical dated evidence was preserved.

Executive result

- 1 Enterprise blockers: **3/12 ready** (B01, B02, B05); **9 open**.
- 1 POS program: **0/10 gates passed**; first blocker G1.
- 1 G1 decisions: **0/11 authentically approved**.
- 1 G1 technical contract: **12/13 checks pass**. The failing control is `cash_only_and_store_credit_runtime_control`.
- 1 Destructive migration: **0/13 findings approved**; safety gate **8/9**; evidence bundle blocked and stale against current `package.json` and `prisma/schema.prisma`.
- 1 Cameroon: source hashes **7/7**; qualified-review preflight **4/12**; production gate **11/12**.
- 1 Schema and type integrity: `prisma validate` and `typecheck` **pass**.
- 1 Focused validator suites: **6/8 suites and 48/50 tests pass**. Both failures are caused by the same POS cash-only mismatch.

The exact machine-readable matrix is in `what-next/STOQUIFY_BLOCKER_TEMPLATE_EVIDENCE_RECONCILIATION_2026-08-18.json`.

Current DOCX validation

Source: docs/Compliance/Complaince authorization validation.docx Current stable SHA-256: `cdca6c7d2bf6513b84301713e529cfea9d6dc8f218a4acdb8d51bc538d626f3f` Bytes: 464884 Modified UTC: 2026-08-18T03:10:28.3890841Z

Two complete reads matched and the source was not locked. The package contains 19 entries and two handwritten-signature-like JPEGs:

word/media/image1.jpeg	268495	aa77607039406b919bef4d65fc16424aea9f45b10de39fa47415a98a1e8a864a	image bytes verified; signer/role/authority unverified
word/media/image2.jpeg	180993	cdfd3824056ea30ea941c0ed8395cf75ad07d632e53e1c7812c59c9f64072b29	image bytes verified; signer/role/authority unverified

There are zero OOXML digital-signature parts, certificate relationships, signature-origin relationships, detached-signature references, or immutable approval identifiers. Both images are in the same unlabelled drawing paragraph before a separate Maker/Checker name section. Nothing reliably maps either image to a named person, role, decision, artifact hash, fresh-auth event, or signing timestamp.

The current document also introduces unresolved identity conflicts:

SANGO MALO	Migration operator / proposed maker	declaration only; no approval credit
MAXIMILLIANO BONGA	Migration checker	declaration only; no approval credit

Tamen Marceline	Maker	conflicts with SANGO MALO
Yonga Springfield	Checker	conflicts with MAXIMILLIANO BONGA
KOUATCHOUA MARK	Product approver; Product Owner or Financial Controller	author/declarant only; role and authority unverified
KOUATCHOUA MARCELINE	Controller approver; SYSTEM ADMINISTRATION	does not prove financial-controller authority
Qualified Cameroon reviewer	Not identified	missing
Independent Cameroon checker	Not identified	missing

The two images therefore receive **zero gate approval credit**. The dated validation is under docs/pos-enterprise-grade-audit/evidence/migration-certification/2026-08-18/ with its SHA-256 manifest.

Repository and evidence bindings

G1 frozen contract	11434eb3e1af1826516426e90d2d53a2faa47ade361d91191b5f3e0c950a36db	current register binding matches
G1 approval register after source assessment	49e19d9ed6c83df23010264ffff4bb92dbe63ba4c2e7a8e3acdc42c0e4fe8340	0 decision approvals
POS program definition	95058c201dad8c9693d2a96830ce492828a5245baaf7bac36f92a97059e195f2	control-plane input present
Migration raw bytes	f7de8dc7ace0a5e063cdb7ecd9527e77807b7f872e474546819e9fca13a273d4	current
Migration canonical LF	2fde92f4ad0cbb1a2a517b12e71c38997dc4956c9d57d70ff1ae0c636ff2f191	current gate hash
13-operation inventory	55d332c3319b65acfd415e64042a15504d12861b664429af7e63155296e1ad1	recomputed and matches template
Prisma schema	3a4b618b45b3bd5295a49ba7ab755058895be867ad55000a98371a5e03eae5db	current; old template value cdbc9c . . . is stale
package.json	59680ad3c77fc9290d1a1c5b97d7a4d9fc1288312871952acdbd39430f0d008a	current; rolling bundle binding is stale
Migration approval registry	6d386babbd94bcc3eabbdae9ba493717bbe47a12aa769a6cf7ed23ff85fc2192	valid empty registry; 0 approvals
Unsigned migration template manifest	641e49f731c71a2e914166699eeb8dd05a7232c559df60648d42db87a6923d48	all 6 listed files match; not approval evidence

Candidate observed at reconciliation: commit 35b4cc6a06a50ee11de5bfce6b04993e38bd589a, HEAD tree 7efce91d5ba871e91470f60ed3b53833a1c3b4b4, dirty with 208 observed paths. It is not a promotable freeze.

Enterprise blocker matrix

B01	READY	build summary → b01Ready	Release engineering	Rebind the passed build to the final clean candidate
B02	READY	isolated PostgreSQL immutability proof	Payroll data-control owner	Preserve non-production claim boundary
B03	BLOCKED_EXTERNAL_CONFIG	production preflight + migration history → b03Ready	Production database/platform owner	Approved remote target, authorized deploy, direct post-deploy history health
B04	BLOCKED_EXTERNAL_CONFIG	release-secret preflight → b04Ready	Security/platform secrets owner	Managed references, release-enforced 21-check pass, HTTPS and live-delivery configuration
B05	READY	country-pack production source evidence → b05Ready	Country-pack evidence custodian	Preserve 7/7 source binding
B06	REQUIRES_EXPERT_REVIEW	review preflight + production gate → b06Ready	Qualified Cameroon reviewer + independent checker	Complete all 12 review checks and verify the signed artifact
B07	BLOCKED_DEPENDENCY	credential rotation register	Security credential owner	Resolve 31 authority, binding, classification, owner, and approval blockers
B08	BLOCKED_DEPENDENCY	operational release register	Release operations/SRE	Resolve 152 release, CI, governance, owner, scheduler, alert, and credential blockers
B09	WAIT_FOR_STABLE_TREE	Phase 2A freeze attestation	Release manager	After B01–B08, create a clean zero-drift freeze
B10	BLOCKED_DEPENDENCY	operational approvals/owners + B09	Product/security approvers and six operating-owner pairs	Bind approvals and owner acceptances to the clean freeze
B11	BLOCKED_DEPENDENCY	Phase 2B promotion gate	Phase 2B authority	23/23 after B01–B10 and Gate 017 GO
B12	NOT_STARTED	Phase 3 promotion gate	Phase 3 production authority	34/34 after a successful bounded pilot

POS gate matrix

G1	None	BLOCKED_TECHNICAL_AND_AUTHENTIC_APPROVALS	Cash-only UI mismatch; D-01–D-11 0/11	Reconcile tender scope; collect exact-hash approvals
G2	G1	BLOCKED_DEPENDENCY	Transaction/access proof incomplete	Implementation and read-only preflight permitted
G3A	G2	BLOCKED_DEPENDENCY	EXT-PROVIDER-SANDBOX missing	Keep provider/electronic completion disabled
G3B	G2	BLOCKED_DEPENDENCY	EXT-CM-QUALIFIED-REV IEW missing	Keep production fiscalization fail-closed
G4	G2, G3B	BLOCKED_DEPENDENCY	EXT-HARDWARE-MATRIX missing or excluded	Retain simulation-only classification
G5	G3A, G3B, G4	BLOCKED_DEPENDENCY	EXT-CLOSE-CYCLE missing	Build/test without production-close claim
G6	G2	BLOCKED_DEPENDENCY	EXT-INVENTORY-POLICY unapproved	Keep unsupported inventory combinations blocked
G7	G3A, G3B, G6	BLOCKED_DEPENDENCY	EXT-AR-RETURNS-POLICY unapproved	Preserve compensating-event/non-production limits
G8	G3A, G3B, G4, G5, G6, G7	BLOCKED_DEPENDENCY	EXT-OPS-DRILLS missing	Prepare harnesses; no readiness claim
G9	G8	BLOCKED_DEPENDENCY	EXT-PILOT-COHORTS not started	Do not start pilot without separate authorization

G1 decision matrix

All records target docs/pos-enterprise-grade-audit/EXECUTION_06_G1_CONTRACT_APPROVAL_REGISTER.json:decisionApprovals[]. Every approval must bind the exact G1 contract SHA-256 and selected option, contain all required roles, and carry authority, fresh-auth, approval time within ten minutes, signature reference, and signature-evidence SHA-256.

D-01	DISABLE_HIDE_AND_REJECT_STORE_CREDIT	Product owner; Financial controller; Payments owner	pending; current UI also exposes non-cash methods
D-02	TERMINAL_CURRENT_SESSION_CASH_PLUS_ONE_SESSION_DRAWER_OPENING_CLAIM	Retail operations owner; POS architect; Security owner	pending; drawer-claim gap remains explicit
D-03	ELECTRONIC_TENDER_DISABLED_UNTIL_NAMED_PROVIDER_APPROVED	Payments owner; Treasury owner; Security owner	pending; UI exposure conflicts with disabled scope
D-04	OFFLINE_CAPTURE_DISABLED	Product owner; Risk owner; Retail operations owner	pending
D-05	EDGE_151_WINDOWS_10_25H2_SIMULATED_DESKTOP_PDF_ONLY_DEVELOPMENT	Retail operations owner; QA owner; Support owner	pending signed matrix/exclusion
D-06	LINKED_COMPENSATING_FULL_SALE_REFUND_AND_VOID_CURRENT_SESSION	Financial controller; Retail operations owner; Risk owner	pending; partial-return/maker-checker gaps explicit

D-07	CAMEROON_XAF_EN_FR_DEVELOPMENT_ONLY	Product owner; Financial controller; Qualified Cameroon reviewer	pending qualified review and approvals
D-08	NO_PRODUCTION_SLO_UNTIL_D05_MATRIX_AND_MEASURED_BASELINE	SRE owner; Product owner; Support owner	pending baseline and approvals
D-09	ORDER_CONFIRMATION_NON_POSTING_INVOICE_FROM_ACCEPTED_DELIVERED_QUANTITY	Financial controller; O2C product owner; Qualified accounting reviewer	pending qualified/accountable approvals
D-10	RESERVATION_AFFECTS_AVAILABILITY_ONLY_PHYSICAL_ISSUE_OWNERS_STOCK_AND_COGS	Inventory controller; Fulfillment owner; Accounting owner	pending
D-11	KEEP_SESSION_DRAWER_BUSINESS_DAY_STATEMENT_RECONCILIATION_AND_CLOSE_SEPARATE	Financial controller; Treasury owner; Retail operations owner	pending; business-day aggregate missing

Template disposition

TEMPLATE-01 destructive migration	current migration hashes, 13 finding hashes, operation inventory, empty registry	current schema/bundle bindings stale; all production/maker/checker fields missing	preserve 2026-08-17 history; supersede after clean candidate
TEMPLATE-02 authentication attestation	declared names/localhost scope/historical timestamps	fresh auth, authority, exact manifest binding, both signatures	no signature credit
TEMPLATE-03 Cameroon review	7/7 source binding and fail-closed runtime facts	qualified identity, qualification, conflict, review window, four decisions, final decision, signed artifact, checker	source ready; expert approval blocked
TEMPLATE-04 hardware	declared simulated workstation and exclusions	physical proof or signed exclusion; retail/QA/support approvals	simulation only
Migration approval JSON bundle	all six listed file hashes match	schema snapshot stale; every human/production field absent	valid unsigned template bytes only
Cameroon qualified-return JSON	source identifiers/hashes and required fixture families	reviewer, review window, digest recomputation, decisions, signed artifact, checker	4/12 preflight

No historical template was edited to rewrite its 2026-08-17 state.

Verification results

npm run pos:g1:contract:report	0	blocked; technical invalid; approvals 0/11
npm run pos:enterprise:program:report	0	blocked; program control plane invalid; 0/10 gates
node scripts/enterprise-release-blocker-status.js --mode report	0	blocked; 3/12 ready
npm run prisma:migration:risk:review	0	review packet generated; 0/13 approved
npm run prisma:migration:evidence:gate	1	expected block plus current bundle drift on package.json and Prisma schema
npm run prisma:migration:safety:gate	1	expected block; 8/9, 0/13 approved
npm run statutory:country-pack:review:preflight	0	blocked report; 4/12
npm run statutory:country-pack:gate	1	expected block; 11/12
npm run release:secrets:preflight	0	conditional local posture; 5/21; release enforcement off
npm run agent:credential-rotation:report	0	blocked; 31 blockers
npm run agent:operational-release:report	0	blocked; 152 blockers
npm run agent:phase2b:entry:report	0	blocked; 2/23
npm run agent:phase3:entry:report	0	blocked; 0/34
npm run prisma:validate	0	passed
npm run typecheck	0	passed
Focused 8-suite Jest run	1	6/8 suites, 48/50 tests; two POS cash-only failures
npm run policy:gates	—	skipped: focused reconciliation not all passing
npm run verify:release	—	skipped: authentic prerequisites and clean candidate absent

Multidisciplinary findings

Enterprise/platform architecture	G1 remains the correct first dependency; later gates must stay blocked.
Backend/domain/integration	Store-credit rejection exists server-side, but the client list violates the cash-only frozen scope.
Data/database/migration	Migration/finding hashes are stable; current rolling bindings and production evidence are not.
Security/IAM/privacy	Unlabelled handwritten images cannot prove identity, authority, fresh auth, or artifact binding.
Frontend/design system	The tender selector exposes unsupported non-cash methods.
Workflow/accessibility/localization	Hardware/browser evidence remains simulation-only and incomplete for G4.
Product/business process	Authorship and ambiguous alternative-role labels do not establish accountable approval.
Quality/release assurance	Schema/type checks pass; two focused tests fail on the same POS regression.
SRE/DevSecOps	152 operational blockers remain; no production-like drills are complete.
SaaS/product operations	Fail-closed development may continue; rollout and expansion remain unauthorized.
Finance/internal controls	SYSTEM ADMINISTRATION does not prove financial authority.
Cameroon statutory	Sources are bound, but qualified legal conclusions and checker verification are missing.
Audit/records/data quality	cdca6c7d . . . is current; 499b . . . and f373 . . . are historical/stale.
POS/inventory/offline	Cash-only and offline-disabled are the safe current boundaries.
Payments/reconciliation	No named provider or authoritative payment-state/settlement evidence exists.
API/webhook boundary	Not applicable to DOCX signature semantics; provider/webhook evidence remains a separate G3A blocker.
Change/support/rollout	Exact residual returns are assigned; rollout must wait for validated returns.

Final disposition

The updated G1 register records the current source hash and the zero-credit validation. No decision approval, migration approval, reviewer qualification, hardware certification, secret, provider activation, deployment, pilot, or release authority was invented.

Use `what-next/STOQUIFY_RESIDUAL_AUTHENTIC_RETURN_CHECKLIST_2026-08-18.md` for the exact remaining owner/role/field/format/path returns.
