Minimum evidence chain for one G1 signer

- 1 User .id is active, verified and tenant-bound.
- 2 PayrollEmployee.id is linked to that subject using controlled identity evidence.
- 3 Employment status is corroborated by employer and, where applicable, CNPS records.
- 4 An active HrisEmploymentAssignment identifies position and organizational scope.
- 5 A separate governance appointment grants the exact canonical G1 control role.
- 6 Independent SoD/COI and qualification checks pass.

- 7 The human signs the exact decision through fresh authentication.
- 8 The final artifact is exported, rehashed and independently verified.

No step may be inferred solely from the one before it.
