

Compliance authorization DOCX validation — 2026-08-18

Blocker and gate readiness evidence

BLOCKER AND GATE ASSESSMENT REPORT

Prepared 2026-08-18

Evidence-led · bilingual-ready · accessibility-aware · implementation-bounded

Connected operations. Explicit controls. Inspectable evidence.

Source: docs/Compliance/Complaine authorization validation.docx Stable source SHA-256: cdca6c7d2bf6513b84301713e529cfea9d6dc8f218a4acdb8d51bc538d626f3f Bytes: 464884 Last modified UTC: 2026-08-18T03:10:28.3890841Z Validation time: 2026-08-18T04:44:09.8632269Z

Verdict: **stable and readable, but rejected as gate signature evidence.**

Two complete reads produced the same SHA-256. The source was not locked during this validation and was not modified.

Package and signature inspection

OOXML package entries	19	VERIFIED_REPOSITORY_FACT
OOXML digital-signature parts	0	VERIFIED_REPOSITORY_FACT
Certificate relationships	0	VERIFIED_REPOSITORY_FACT
Signature-origin relationships	0	VERIFIED_REPOSITORY_FACT
Detached-signature references	0	VERIFIED_REPOSITORY_FACT
Immutable approval identifiers	0	VERIFIED_REPOSITORY_FACT
Handwritten-signature-like media	2 JPEG files	byte presence verified; signer/authority unverified

The media files are:

- 1 word/media/image1.jpeg: 268495 bytes, SHA-256
aa77607039406b919bef4d65fc16424aea9f45b10de39fa47415a98a1e8a864a.
- 1 word/media/image2.jpeg: 180993 bytes, SHA-256
cdfd3824056ea30ea941c0ed8395cf75ad07d632e53e1c7812c59c9f64072b29.

Both images appear in the same unlabelled drawing paragraph immediately before a separate Maker/Checker name section. The OOXML has no trustworthy relationship tying either image to a named person, role, target hash, decision, scope, fresh-authentication event, or signing time. Their presence is a repository fact; treating them as a verified signature would be unsupported.

Identity and role reconciliation

SANGO MALO	Migration operator; Database administrator / engineering lead	VERIFIED_HUMAN_DECLARATION_NOT_GATE_APPROVAL	Name/asserted role only; no maker signature credit
MAXIMILLIANO BONGA	Migration checker; Database administrator / engineering lead	VERIFIED_HUMAN_DECLARATION_NOT_GATE_APPROVAL	Name/asserted role only; no checker decision credit
Tamen Marceline	Maker	CONFLICTING_EVIDENCE	Conflicts with the SANGO MALO maker proposal
Yonga Springfield	Checker	CONFLICTING_EVIDENCE	Conflicts with the MAXIMILLIANO BONGA checker proposal
KOUATCHOUA MARK	Product approver; Product Owner or Financial Controller	ROLE_OR_AUTHORITY_UNVERIFIED	Author/declarant only; no D-01–D-11 approval credit
KOUATCHOUA MARCELINE	Controller approver; SYSTEM ADMINISTRATION	ROLE_OR_AUTHORITY_UNVERIFIED	Does not prove financial-controller authority
DGI / MINFI / CNPS	Signature labels	MISSING	Organization labels are not individual qualified signers
Qualified Cameroon reviewer	Not identified	MISSING	G3B remains blocked
Independent Cameroon checker	Not identified	MISSING	G3B remains blocked

Package metadata naming **KOUATCHOUA MARK** as creator and last modifier is authorship metadata, not authenticated approval intent.

Binding and timing defects

- 1 The current source hash is `cdca6c7d...`; historical `499b...` and `f373...` values are stale for the current bytes.
- 1 The document simultaneously declares a localhost development-only certification schema and production/statutory authorization, so the scope is internally conflicting.
- 1 The supplied `2026-08-17T08:00:00Z` operator/checker timestamps predate later evidence and do not bind the current final hashes.
- 1 No approval binds the frozen G1 contract SHA-256 `11434eb3e1af1826516426e90d2d53a2faa47ade361d91191b5f3e0c950a36db` or any specific D-01–D-11 selected option.
- 1 No maker/checker decision binds all 13 destructive finding hashes, a final evidence manifest, production target census, backup, or restore proof.

Gate disposition

G1 D-01–D-11	Identity/scope declaration only	0	BLOCKED_0_OF_11
Destructive migration	Conflicting named parties and image-byte evidence only	0	Exact-hash maker/checker approval absent
Authentication attestation	Names and historical timestamps only	0	Fresh-auth/immutable identity proof absent
Cameroon country pack	Requested scope and organization labels only	0	Qualified reviewer/checker absent
Hardware	Simulation-scope declaration only	0	Physical proof or signed production exclusion absent

No production, statutory, provider, hardware, human-approval, migration, or pilot gate is lifted by this DOCX. Safe cash-only, synthetic, non-statutory development may continue under the existing fail-closed scope.
