

Stoquify Agent Runtime Phase 2A Scheduler Deployment Evidence Capture Execution Report

Date: 2026-07-25

Phase: 2A controlled internal pilot preparation

Status: Repository implementation complete; external evidence blocked

Activation authorized: No

Executive Result

Stoquify now has a dedicated scheduler control-plane evidence collector and an operational release-gate ratchet for deployment authority. The implementation closes the repository-side gap identified during the skill 017 review without expanding agent authority.

The current environment does not provide an evidence endpoint, so the real apply preflight failed closed on **SCHEDULER_EVIDENCE_URL_MISSING**. No partial evidence artifact or register mutation occurred.

Implemented

- authenticated query-free HTTPS capture;
- generated invalid-bearer probe requiring HTTP 401;
- bounded JSON response and forbidden secret-value key rejection;
- value-free references and hashes only;
- 24-hour attestation freshness;
- inactive **PILOT_CERTIFIED** package requirement;
- exact package, release, commit, artifact, and deployment binding;
- exact five-minute cadence;
- single-concurrency or lease-safety proof;
- bounded timeout;
- missing-configuration HTTP 503 proof;
- failure-alert provenance;
- immutable existing deployment identity;
- scheduler-only operational register apply;
- permanent false/false/null activation boundary.

Commands Added

```
npm run agent:scheduler:evidence:report
npm run agent:scheduler:evidence:gate
npm run agent:scheduler:evidence:apply
```

Verification

Check	Result
Scheduler collector tests	9/9 passed
Operational release gate tests	22/22 passed
Focused evidence suite	8 suites, 83 tests passed
Focused open-handle detection	Passed
Full Jest	474 suites, 2,862 tests passed; 3 suites and 15 tests skipped
Focused ESLint	Passed
TypeScript	Passed
Phase 2A static ratchet	Passed
Agent runtime gates	Passed
Service boundary	Passed; 0 active violations
Raw-error boundary	Passed; 0 active unsafe findings
Prisma schema	Valid
Local migration safety	8/8; 34 migrations; 0 destructive findings
CI configuration readiness	11/11

Fail-Closed Preflight

```
npm run agent:scheduler:evidence:apply
SCHEDULER_EVIDENCE_URL_MISSING
```

Verified consequences:

- no JSON evidence artifact;
- no Markdown evidence artifact;
- no scheduler deployment field populated;
- no secret printed;

- `activationAuthorized: false;`
- package remains inactive.

Updated Operational Gate

The operational release gate remains **BLOCKED**:

Category	Blockers
Release	14
CI	15
Governance	12
Approvals	14
Owners	36
Scheduler	39
Alerting	17
Credential rotation	5
Total	152

The six new scheduler blockers are intentional authority requirements:

- deployment source-system reference;
- deployment attestation reference;
- deployment authority invalid-auth evidence reference;
- deployment attestation digest;
- deployment evidence hash;
- deployment attestation timestamp.

Skill 017 Result

REJECTED / NO-GO – HIGH-AUTHORITY RELEASE EVIDENCE IS INCOMPLETE

Repository controls pass, but promotion remains blocked by:

- no immutable clean-commit release package and protected CI/deployment attestation;
- no scheduler evidence endpoint or reconciler base URL;
- no real product/security approvals or six named owner acceptances;
- no production alert transport evidence;
- 15 unresolved credential classes and 31 credential blockers;
- missing production-purpose secrets;
- missing safe production PostgreSQL target;
- missing statutory source-artifact hash verification and expert approval.

No package entered **ACTIVE_INTERNAL**. Phase 3 remains unauthorized.

Next Execution

1. Freeze a clean reviewed commit and certified artifact.
2. Deploy the scheduler control-plane evidence endpoint with a managed bearer credential.
3. Run `npm run agent:scheduler:evidence:apply`.
4. Configure the real reconciler base URL and run `npm run agent:reconciler:evidence:apply`.
5. Supply credential-rotation, governance, approval, ownership, alert, secret, database, and statutory evidence.
6. Rerun the credential gate, operational gate, and skill 017.
