

Stoquify Landing Page 9+ Roadmap Prompt

Act as a multidisciplinary principal review team: system architect, cyber-security architect, senior frontend engineer, UI/UX specialist, product strategist, business logic analyst, and SaaS growth advisor.

Project:
Stoquify / AqStoqFlow public landing page.

Workspace:
'E:\ohada saas\Focused projects\stoquify'

Mission:
Using the existing landing-page competitive review document, propose a practical roadmap to raise Stoquify's public landing page to a 9+/10 quality level across every evaluated dimension: first impression, product clarity, visual quality, messaging, trust, conversion flow, responsiveness, accessibility, performance posture, and OHADA/SYSCOHADA market fit.

Primary source document:
- 'docs/landing page/STOQUIFY_LANDING_PAGE_COMPETITIVE_REVIEW_2026-07-19.pdf'
- Also use the source Markdown if easier:
 'what-next/STOQUIFY_LANDING_PAGE_COMPETITIVE_REVIEW_2026-07-19.md'

Evidence to inspect:
- 'app/[locale]/(home)/page.tsx'
- 'app/[locale]/(home)/landing.css'
- 'app/[locale]/(home)/layout.tsx'
- 'app/[locale]/(home)/landing-fonts.ts'
- 'components/landing/*'
- 'messages/en.json'
- 'messages/fr.json'
- 'public/'
- 'docs/landing page/'
- 'what-next/ui-ux/'
- Relevant existing screenshots, UI audits, and landing-page reports

Do not redo the full competitive audit unless a claim needs verification. Use the existing document as the baseline.

Tasks:

1. Extract every recommendation, weakness, opportunity, and score gap from the competitive review document.
2. Convert the recommendations into a phased roadmap that can realistically move each evaluated area to 9+/10.
3. Separate the roadmap into:
 - P0: must-fix before public growth push
 - P1: conversion and trust upgrades
 - P2: premium differentiation and growth improvements
 - P3: optional experiments and future optimization
4. For each roadmap item, include:
 - Problem it solves
 - Target landing-page dimension
 - Expected impact

- Effort level: Small / Medium / Large
 - Dependencies
 - Recommended owner lens: frontend, UX, product, growth, security, compliance, content, or architecture
 - Acceptance criteria
 - Verification method
5. Propose the ideal future landing-page structure, including:
 - Above-the-fold hero
 - Product clarity section
 - Buyer pathway section
 - OHADA/SYSCOHADA trust section
 - Product proof/screenshots
 - Use cases
 - Pricing/adoption CTA
 - Security/compliance proof
 - Final conversion CTA
 6. Provide revised scoring targets showing how the roadmap moves each dimension from its current score to 9+.
 7. Identify which current sections should be kept, simplified, moved to dedicated pages, or removed from the main landing page.
 8. Include a concise implementation sequence that avoids broad rewrites and protects the existing premium visual identity.

Expected artifact:

Save the roadmap as:

```
`docs/landing page/STOQUIFY_LANDING_PAGE_9_PLUS_ROADMAP_2026-07-19.md`
```

Also create a PDF version in the same folder if PDF tooling is available:

```
`docs/landing page/STOQUIFY_LANDING_PAGE_9_PLUS_ROADMAP_2026-07-19.pdf`
```

Success criteria:

- The roadmap directly maps back to the review document.
- Every evaluated landing-page dimension has a clear path to 9+/10.
- Recommendations are practical, prioritized, and implementation-ready.
- The plan preserves Stoquify's premium OHADA/SYSCOHADA positioning.
- The plan reduces cognitive overload without making the page feel generic.
- The artifact is saved under `docs/landing page/`.

Non-goals:

- Do not implement landing-page code changes yet.
- Do not redesign the whole product brand from scratch.
- Do not remove OHADA/SYSCOHADA specificity.
- Do not invent customer proof, metrics, testimonials, or compliance claims.
- Do not touch unrelated files.
