

Stoquify Landing Page Skill Install Report

Date: 2026-07-19

Workspace:

- E:\ohada_saas\Focused_projects\stoquify

Primary source report:

- docs/landing_page/STOQUIFY_LANDING_PAGE_SKILL_SUITE_REPORT_2026-07-19.md

Source skill suite:

- E:\ohada_saas\Focused_projects\stoquify\docs\landing_page\skills-suite

Install destination:

- C:\Users\J COMPUTER\.codex\skills

Validator:

- C:\Users\J COMPUTER\.codex\skills\.system\skill-creator\scripts\quick_validate.py

Result

The required Stoquify landing-page skills were inspected, compared against the installed copies in the normal Codex skills folder, and validated.

No source-to-destination differences were found during this run. All 11 skills were already installed and identical to the source suite, so no installed skill files were overwritten.

No landing-page implementation code was changed.

Summary

Outcome	Count
Required skills	11
Installed new	0
Updated existing	0
Skipped identical	11
Validation failures	0

Per-Skill Installation And Validation

Skill	Source path	Destination path	Status	Validation
stoquify-landing-00-orchestrator	docs/landing page/skills-suite/stoquify-landing-00-orchestrator	C:\Users\J COMPUTER\.codex\skills\stoquify-landing-00-orchestrator	skipped-identical	passed: Skill is valid
stoquify-landing-01-positioning-clarity	docs/landing page/skills-suite/stoquify-landing-01-positioning-clarity	C:\Users\J COMPUTER\.codex\skills\stoquify-landing-01-positioning-clarity	skipped-identical	passed: Skill is valid
stoquify-landing-02-cta-conversion-flow	docs/landing page/skills-suite/stoquify-landing-02-cta-conversion-flow	C:\Users\J COMPUTER\.codex\skills\stoquify-landing-02-cta-conversion-flow	skipped-identical	passed: Skill is valid
stoquify-landing-03-proof-trust-claims	docs/landing page/skills-suite/stoquify-landing-03-proof-trust-claims	C:\Users\J COMPUTER\.codex\skills\stoquify-landing-03-proof-trust-claims	skipped-identical	passed: Skill is valid
stoquify-landing-04-information-architecture	docs/landing page/skills-suite/stoquify-landing-04-information-architecture	C:\Users\J COMPUTER\.codex\skills\stoquify-landing-04-information-architecture	skipped-identical	passed: Skill is valid
stoquify-landing-05-ui-visual-system	docs/landing page/skills-suite/stoquify-landing-05-ui-visual-system	C:\Users\J COMPUTER\.codex\skills\stoquify-landing-05-ui-visual-system	skipped-identical	passed: Skill is valid

Validation Commands Run

Structural source-suite check:

```
rg -n "name:|description:||## Mission||## Evidence||## Workflow||## Acceptance Criteria||## Verification||## Risk Controls||## Expected Artifacts||## Stop Conditions||## Related Skills" "docs\landing page\skills-suite" -g "SKILL.md"
```

Guardrail source-suite check:

```
rg -n "invent|fake|unsupported|sample data|sample/demo|OHADA|SYSCOHADA|CTA|route smoke|screenshots|WCAG|Critical/Serious|protected-route|privacy" "docs\landing page\skills-suite" -g "*.md"
```

Installed skill validation:

```
python "C:\Users\J COMPUTER\.codex\skills\.system\skill-creator\scripts\quick_validate.py" "<installed-skill-folder>"
```

Notes

- The install destination was resolved from the normal Codex skills folder: C:\Users\J COMPUTER\.codex\skills.
- \$CODEX_HOME was not needed for this run because the resolved destination matched the default normal Codex skills folder.
- Each installed skill should be available to Codex after skill discovery refresh, typically on the next turn/session.
